The underpainting creates a visual structure and another layer from which we can get to know the subject. We will learn how to create an underpainting using one color to create darks and lights as our foundation. In the final stages we will be adding paint. We will learn how to mix colors ahead of time to use for our flesh tones. The world of color is fascinating and there is so much to explore. We will discuss how to apply color and to see them for what they are and how to create a dynamic, life-like feeling. A list of all materials will be sent upon registration.

NEW! Luminous Light: Re-imagining the Visionary Landscape (int./adv.)

Karen Edelmann \$215/seniors \$205
In the late 19th century, in what was thought to be an outgrowth of the late Hudson River School, American artists began to paint landscapes that reflected a more poetic view of nature. Later referred to as Luminists or Tonalists, these artists created work that emphasized tranquility and calm. Between 1880 and 1915, using dark, neutral hues and by their handling of color, atmosphere and liquid light, they strove to communicate a quiet, almost spiritual message to the viewer. In this 6-week session we'll study the works of those artists, paying particular attention to George Inness. Using two large canvases, one for sunrise and one for sunset, we'll work to bring their techniques into our own time and our own aesthetic. We'll take a fresh look at mixing and using neutrals, paying close attention to contrast, color compliments and above all, using minimal imagery for maximum effect. References supplied, farther information on sign-up. Intermediate and advanced students, oils preferred. A materials list will be sent upon registration.
